SUMMARY

This community service activity aims to provide an explanation and understanding related to the role of housewives as family managers in financial management in the family. The purpose of this activity is specifically so that mothers in Sidodadi Village can apply skills in managing finances and making reports.

simple finance.

The partners of this community service activity are housewives (women's groups) in Sidodadi Village, East Medan District. The method used in this activity is in the form of counseling related to household financial management where many residents experience household problems and conflicts caused by economic factors or family finances that are lacking. Financial recording has not been running so that it cannot show the level of success in the household, where financial reports can also be used for decision making in the household. The purpose of this community service is to provide understanding and motivate housewives to do simple financial recording as a means of controlling family finances and implementing household financial planning, making a budget according to needs to minimize unnecessary expenses, and separating the recording of income and expenses in order to invest for the future, so that household finances will be controlled and a prosperous family will be achieved, and increase knowledge about household financial management to avoid economic problems.

Key Words: Household Financial Recording for Mothers

INTRODUCTION

1.1 Situation Analysis

Household life is inseparable from financial problems, therefore managing household finances is not an easy matter. It is necessary to have the right way to manage household finances so that all family needs can be met. Many factors affect household finances. Starting from mandatory needs that must be met to desires or consumption that are additional or entertainment. Efforts that can be made to change the behavior of Indonesian society that is consumptive are through household financial management. Managing household finances is not only the responsibility of one person. Both husband and wife have a vital role in managing household finances. When talking about the problem of community life, it must involve human welfare and social life in society.

Household financial management is an art to manage household or family finances by a mother, the management is intended to create a prosperous and peaceful family condition. Managing family finances seems simple, but in practice many people are unable to manage it well, especially mothers, it is not a matter of how big or small the salary / income received, but how to manage spending money or shopping so that household finances are stable and sufficient. Housewives have a role in the condition of family welfare. The role of women as contributing to the formation of a prosperous family as the smallest unit in community life.

Household financial goals are good through household financial management with the application of financial management principles in meeting current and future needs. Household finances seem simple, but if not applied in can have an impact on household welfare problems. For that, the existence of household financial planning and management will be able to properly regulate the priority scale and. Household financial problems are caused by the behavior and patterns of spending money of each family member.

Sidodadi Village, Environment V has a PKK Mothers association that implements and fosters the implementation of work programs according to the conditions and needs of the community. Collecting, mobilizing and fostering the potential of the community, especially families for the implementation of PKK programs.

The shortcomings of the PKK mothers' group have never implemented the compilation of household income and expenditure records, so that many household problems and conflicts from economic factors or family finances are lacking. In fact, on the one hand, a prosperous family if the economic factors are fulfilled to be able to become a harmonious household must be able to manage good finances in determining income, expenses and future investments in order to create a prosperous family. Efforts that can be made to change the behavior of Indonesian society that is consumptive are through household financial management.

1.2 Problem Identification

After being identified by the PKK Mothers' Group, several problems were identified:

- Lack of knowledge in implementing household financial reporting records
- Lack of knowledge regarding the separation of income and expenditure records
- The importance of managing household finances in creating a prosperous family.

1.3 Activity Objectives

1. Education in managing household financial management
2. Providing counseling on the benefits of recording household finances
3. Motivating PKK Mothers' Groups to implement household financial management through notes

1.4 Benefits of the activity:

1. Improve understanding of preparing household financial reports
2. Improve the ability to separate recording activities in creating household financial usage results.
3. Increase knowledge of the importance of managing household finances

IMPLEMENTATION OF ACTIVITIES

3.1 Implementation Method

The method of implementing the activity is as follows:

Lecture Method

With this lecture method through presentations to partners about the importance of managing household financial management in forming a prosperous family, recording household income and expenses, and investing in the future through presentations by providing explanations and direct practice to partners. In addition to the presentation, questions and answers were also conducted with partners, so that it is hoped that with the questions and answers partners will later gain a more detailed understanding so that it is easier to understand and can be directly practiced in the household. During the presentation, partners can follow the activities well.

Training Practice Method

With the direct practice method, the service team provides training to the mothers of the PKK Group in the V Sidodadi Village regarding the process of recording household income and expenses in a simple and easy way, training in motivating residents to set aside income to have investments or savings that will be used in the future. It is hoped that this practice method can increase the motivation of the mothers of the PKK Group in the V Sidodadi Village in managing household financial management and recording household income and expenses, as well as having savings that will be used in the future, then the PKK mothers in the V Village can socialize all residents of the V Village

3.2 Time and Location of Activities

It was agreed that the training activity would be held at the housing complex of the Head of Environment V with the following schedule: Day/Date: Tuesday, September 12, 2023, at: 10.30 a.m. to 12.00 p.m. WIB At the Head of the Neighborhood's house Address: Jl. Kabanjahe No. 22 Kel. Sidodadi - Medan

3.3 Strategic Target Audience

The focus of this counseling is on the mothers of the PKK Group of Environment V because the housewives lack knowledge or concern for recording household financial problems. So it is

necessary to be given knowledge about recording financial data until a report is formed that can be reviewed for further expenditure actions.

3.4 Activity Stages

The stages in the Community Service Activity Process are as follows:

1. Activity Implementation Procedures

Preparation and Partner Observation Stage, the Service Team conducts observations to determine the problems that occur so that they can provide solutions that are offered by submitting proposals regarding education on recording and managing household finances as well as future investments.

2. Implementation and Education Stage

The implementation stage of mentoring and education for partners, first the service team provides education on household financial management and provides training in recording household income and expenses, as well as education in creating investments or savings for the future.

3. Evaluation Stage

The evaluation stage of the educational and training assistance program is carried out by comparing the condition of partners before and after the community service program through pre-tests and post-tests by providing questions that the community service team gave before carrying out educational and training assistance, then questions that the community service team gave after carrying out educational and training assistance for community service.

4. Reporting

The reporting stage is the final stage of the community service activity, where the community service team reports on the activities carried out by the PKK mothers in Environment V, Sidodadi Village.

ACTIVITY RESULTS

4.1 Results of Activity Implementation

The results of the Community Service that we have done regarding "Educational counseling on household financial recording for PKK mothers in Environment V, Sidodadi Village, East Medan District" are as follows:

- ☐ The PKK mothers of Environment V are very enthusiastic in the mentoring and training activities for recording household financial reports and will implement their household financial planning immediately. Which duringThis has not been implemented optimally because it only creates a makeshift budget to detail monthly needs, and even then it is not routine.
- ☐ The active role of the PKK Environmental Mothers GroupV Sidodadi Village in following each stage of the presentation of the material, giving pre-test and post-test questions, questions and answers given by the service team to the PKK Group Mothers of V Sidodadi Village were very enthusiastic as seen from telling us the service team to find solutions to conflicts in household financial factors from various problems faced, obstacles that occur due to a lack of understanding of the importance of managing a budget in household life.
- ☐ The Activeness of the PKK Group of Mothers in the EnvironmentV in following the practice of making simple financial reports, it is seen that they are enthusiastic about implementing budget planning and investment planning from the planning process of separating mandatory and non-mandatory needs. Many factors affect household finances. Starting from mandatory needs that must be met to desires or consumption that are additional or entertainment. Managing household finances is not only the responsibility of one person. Both husband and wife have vital roles in managing household finances. Then the PKK Group of Environment V Sidodadi Village was motivated to make simple household financial report bookkeeping, because so far they have not implemented household bookkeeping due to limited knowledge in recording.

CONCLUSION & SUGGESTIONS

5.1 Conclusion

Based on the explanation above, it can be concluded,

- ☐ Implementation of community service with PKK mothers as participants Sidodadi Village V Environment is running well and smoothly.
- ☐ This PKM activity can increase understanding of the importance of planning. and management of household financial reports for participants.
- ☐ Able to increase participants' awareness of the importance recording income and expenses through budget percentages according to needs.
- ☐ Motivating PKK mothers in Environment V to invest in the future and save some for urgent needs.
- ☐ Through the practice of preparing household financial reports, training participants are able to prepare and manage budgets easily.

5.2 Suggestions

The suggestion from this Community Service activity is that it needs to be implemented again with more participants and with ongoing material with Financial Reports such as Financial Management. so that PKK mothers can better understand the function of the financial components that are the subject of Analysis in the household world.
